

**Latin American Society for Immunodeficiencies
III Summer School & Registry Meeting
The Jeffrey Modell Centers for Immunodeficiencies in Latin America
Brazilian Group for Primary Immunodeficiencies**

FINAL PROGRAM

May 14 a 17th III LASID summer-school & Registry meeting

Cases – 10 min

Discussion – 30 min

Conferences - 30 min

May 14

12h: Opening and lunch

13.00: 3 cases + discussion (*Karol Cecilia, Jesus Alvarez, Maria Bielke*)

14.00: Diseases of immune dysregulation – Prof. Troy Torgerson

14.30: 3 cases + discussion (*Ana Napoli, Astrid, Estefania Echeverri*)

15.30: Well-defined syndromes with immunodeficiency: Prof. Jose Luis Franco

16.30: coffee

17.00: 3 cases + discussion (*Edgar Martinez, Ana Rozalem, Mariana Gouveia*)

17.30: Agammaglobulinemia: LASID database - Prof. Liliana Bezrodnik

18.00: 2 cases + discussion (*Gabriel Velez, Myrian Esquivel*)

19.30: dinner

May 15

8.30: Pathogenesis of Common variable immunodeficiency – Prof. Klaus Warnatz

9.00: 3 cases + discussion (*Fabiane Pimenta, Syomara Angulo, Maria Esnaola*)

10.00: Severe combined immunodeficiencies and transplantation in Latin America. Prof. Alejandra King

10.30: coffee -break

11.00: 3 cases + discussion (*Anna Navarro, Eunice Rocha, Carlos Furiotti*)

12.00: Bone marrow transplantation and Gene therapy in primary immunodeficiencies. Prof. Bobby Gaspar

12.30: lunch

14.00: SCT: Brazil experience Prof. Juliana Folloni

14.10: newborn screening for SCID – Prof. Bobby Gaspar

14.40: Subcutaneous immunoglobulin: how and when us

15.30: overview of the LASID Registry program and proposals for collaborative work. Prof. Antonio Condino-Neto – Prof. Edith Gonzalez – Prof. Ricardo Sorensen

16.30: coffee
17.00: practical training for LASID registry Edith Gonzalez
19.30: dinner

May 16

8.30: conference: Interpretation of pneumococcus vaccine response - Prof. Ricardo Sorensen
9.00: 3 cases + discussion (*Juan Ogando, Nuria Zurro, Rodolfo Vizcaino*)
10.00: Clinical manifestations in adult patients with common variable immunodeficiency – Prof. Klaus Warnatz
10.30: coffee-break
11.00: 3 cases + discussion (*Ana Fabro, Paula Palacio, Karol*)
12.00: laboratory diagnosis of primary immunodeficiency – Prof. Troy Torgerson
12.30: lunch
14.00: overview of bioinformatics and molecular diagnosis. Prof. João Carlos Setubal,
14.30: Molecular diagnosis and genetic studies of rare diseases in Brazil. Prof. Mayana Zatz and Prof. Maria Rita Passos
15.00: Discussion
15.30: coffee
16.00: An approach to molecular analysis in next generation sequencing - Prof. Carolina Prando and Prof. Edgar Borges de Oliveira Junior
16.30: Gene regulation studies . Prof. Michal Okoniewsk
17.00: Discussion on a Molecular Diagnosis Consortium - Prof. Ricardo Sorensen
19.30: dinner

May 17

8.30: Conscious strategy to evaluate AIRE gene: Prof. Silvia Danielian
9.00: Mendelian susceptibility to mycobacterial infections: Prof. Francisco Espinosa
9.30: 3 cases + discussion (*Blanca Olivier, Elsy Alcocer, Andrea Delgado*)
10.00: Aim: to discuss current data and proposals to continue collaborative work on primary immunodeficiencies. Prof. Ricardo Sorensen
11.00: closing
